NEW ROOTS WORKSHOP

LIVE PROJECT CASE STUDY

EXETER SPRING '26

BACKGROUND

Wynstream Primary School required outdoor learning pods for their school grounds. PTFA fundraising and a donation for some materials by Vistry Group Plc, enabled New Roots Workshop to fund the design and build of the learning shelters as a live project with our young people.

WHY THEY CHOSE US?

- Opportunity to support young people to apply their new skills
- Quality workmanship overseen by skilled instructors
- Cost effectiveness (labour cost savings)

"I am writing to extend our heartfelt thanks for the wonderful new learning pod you have created for our playground. The hard work of your team has created a really brilliant space for children to use at play and lunchtimes.."

Elise Redman
Headteacher,
Wynstream Primary

OUTCOMES & BENEFITS

Project experience
Young people worked together at our workshop, using their newly learned carpentry and roofing skills.

Community collaboration
New Roots learners contributed to a school project that benefits 300 pupils

Applied learning
9 young people worked on this project, with 6 of them delivering and installing the shelter at the school.

Project Planning
Our young people learned how to read and follow construction plans in the build phase

LET'S DISCUSS YOUR PROJECT
